In Maryland, try 146.76 (-), know as the Jessup repeater. It has 8 satellite receive sites and should take you through most of the state.

Andy

Also try 146.73 (-) when you're in Southern NJ. This is the Wilmington, DE machine and has tremendous reach from Cherry Hill, NJ to the Del/MD line.

LAST CALL FOR VOTES (of 2)  
unmoderated group rec.antiques.radio+phono

Newsgroups line:  
rec.antiques.radio+phono      Audio devices and materials of yesteryear.

Votes must be received by 23:59:59 UTC, 20 September 1994.

After this CFV appears on news.announce.newgroups it will be sent to the mailing list <boatanchors@gnu.ai.mit.edu>

This vote is being conducted by a neutral third party. For voting questions only contact rdippold@qualcomm.com. For questions about the proposed group contact Bill Robie <robie@umbc7.umbc.edu>

## CHARTER

Discussion of the use, repair, and collecting of early standard-broadcast radios, phonographs, and any other similarly-related items designed for home entertainment sound receiving or sound reproduction.

This group is intended to be a forum for those with an interest in sound-receiving and sound-reproduction equipment that was generally manufactured prior to the widespread use of transistors. The group's discussion, however, will not be strictly limited to vacuum-tube and mechanical devices, and those with an interest in early transistor radios, early televisions, and other such items that reflect pioneering audio technology will be welcomed.

### Exclusions:

Amateur radio equipment discussion will be directed to the existing amateur radio newsgroups and to the boatanchors list. This is only done because those groups present an established forum for people with an interest in classic amateur radio equipment. Those classic amateur radio collectors who also share an interest in early standard-broadcast equipment will fully appreciate the desire to separate the two interests. Their valuable expertise will, however, be most welcome in all forums.

Since the summer of 1993, there has been an ongoing discussion among those interested in antique radios and phonographs (and other related equipment and materials) about the possibility of forming this newsgroup. That small core of enthusiasts has rapidly grown in number, and now includes representatives of museums, technical specialists, collectors, and novices with an inquisitiveness about sound reproducing and receiving equipment of the past. With enthusiasm for the preservation and enjoyment of these superb expressions of human inventiveness steadily increasing, the time has come to establish a forum through which knowledge of their history, restoration, and use can be shared by experts and newcomers alike. This proposal represents the essence of what an Internet newsgroup can accomplish--it can produce a collective source of knowledge from which useful information can be drawn for years into the future.

Bill Robie, August, 1994

## HOW TO VOTE

Send MAIL to: [voting@qualcomm.com](mailto:voting@qualcomm.com)

Just Replying should work if you are not reading this on a mailing list.

Your mail message should contain one of the following statements:

I vote YES on rec.antiques.radio+phono

I vote NO on rec.antiques.radio+phono

You may also ABSTAIN in place of YES/NO - this will not affect the outcome. Anything else may be rejected by the automatic vote counting program. The votetaker will respond to your received ballots with a personal acknowledgment by mail - if you do not receive one within several days, try again. It's your responsibility to make sure your vote is registered correctly.

One vote counted per person, no more than one per account. Addresses and votes of all voters will be published in the final voting results list.

rec.antiques.radio+phono Bounce List - No need to revote

To: [info-hams@ucsd.edu](mailto:info-hams@ucsd.edu)

### Phonetic Alphabets (Alpha Bravo etc)

There is a widely known alphabet Alpha Bravo ... Yankee Zulu. Such alphabets are variously known as phonetic alphabets, radio alphabets and spelling alphabets. This collection currently includes alphabets for the following languages:

English, French, German, Dutch, Flemish, Italian,  
Rumantsch, Slovak, Polish, Hungarian, Swedish,  
Finnish, Russian and Chinese.

This posting is a repeat of the one of 23rd July.

My thanks to the many contributors, not all of whom are acknowledged below.

I can make no guarantee of accuracy of this information; indeed please send me any corrections or additions.

In my capacity as the editor of this collection I have no objection to the further electronic distribution of this posting in full in circumstances where it is likely to be of interest.

Comments in square brackets are my own.

Brian Kelk bck1@cl.cam.ac.uk  
7 September 1994

\*\*\*\*\* ENGLISH \*\*\*\*\*

The NATO phonetic alphabet (as per the Cambridge Encyclopedia of Language under Seaspeak):

Alpha Bravo Charlie Delta Echo Foxtrot Golf Hotel India  
Juliet Kilo Lima Mike November Oscar Papa Quebec Romeo  
Sierra Tango Uniform Victor Whiskey Xray Yankee Zulu

[The same alphabet, modulo Alfa and Juliett, is approved by the International Civil Aviation Organization and the FAA. The International Telecommunication Union Phonetics list has: Alfa, Juliette, Oscar/Oskar, Victor/Viktor. Dates from about 1956. UK police use Indigo instead of India (?)]

Telecom B:

Alfred Benjamin Charles David Edward Frederick George Harry  
Isaac Jack King London Mary Nellie Oliver Peter Queen Robert  
Samuel Tommy Uncle Victor William Xray Yellow Zebra

[Found in Swedish, Dutch, Hungarian telephone directories. A Swiss directory has: Andrew Charlie Lussy Queenie Sugar]

British A:

Amsterdam Baltimore Casablanca Denmark Edison Florida  
Gallipoli Havana Italia Jerusalem Kilogramme Liverpool

Madagascar New\_York Oslo Paris Quebec Roma Santiago Tripoli  
Uppsala Valencia Washington Xantippe Yokohama Zurich

[An 'international' alphabet in a Dutch telephone directory  
has: Danemark. A 'French' alphabet in a Hungarian directory  
has: Cassablanka Danemark Que'bec Upsala Zu"rich]

Used by police in New York City:

Adam Boy Charlie David Edward Frank George Henry Ida John  
King Lincoln Mary Nora Ocean Peter Queen Robert Sam Tom  
Union Victor William X-ray Young Zebra

[Variants: Eddie Larry Nancy Thomas Yankee Yellow]

Used by police in Nassau County, Long Island, New York:

Adam Boston Chicago Denver Edward Frank George Henry Ida  
John King Lincoln Mary Nancy Ocean Peter Queen Robert Sam  
Thomas Union Victor William X-ray Young Zebra

Used by police in San Diego, California:

Adam Boy Charles David Edward Frank George Henry Ida John  
King Lincoln Mary Nora Ocean Paul Queen Robert Sam Tom Unit  
Victor William Xray Yellow Zebra

Used by police in Hutchinson, Kansas:

Adam Boy Charles David Edward Frank George Henry Ida John  
King Lincoln Mary Nora Ocean Paul Q.. Robert Sam Tom Union  
Victor William X-ray Yankee Zebra

Sometimes used by radio hams (unofficial):

America Boston Canada Denmark England France Germany  
Honolulu India Japan Kilowatt London Mexico Norway Ontario  
or Ocean Pacific Quebec Radio Santiago or Spain Tokyo United  
Victoria Washington Xray Yokohama Zanzibar

[Much variation: Amsterdam, Brazil, Baltimore, Chile,  
Finland, Greece, Guatemala etc]

The ARRL (American Radio Relay League) alphabet (1948):

Adam Baker Charlie David Edward Frank George Henry Ida John  
king Lewis Mary Nancy Otto Peter queen Robert Susan Thomas  
union Victor William x-ray young zebra

[Nowadays the ARRL endorses the NATO/ICAO alphabet]

Allied Services 1945:

Able Baker Charlie Dog Edward Fox George How Item Jig King  
Love Mike Nan Oboe Peter Queen Roger Sugar Tape Uncle Victor  
William X-ray Yoke Zebra

>well dead, and how many people have even seen a radio for 1.2 gig or a  
>higher band?

>73...Jim N2VNO

This is going to start a flame war - I just know it, but I think it's a valid  
point, and one which needs making:

If the "No CW test requirments for HF" crowd get their way, and all these people  
suddenly have access to the HF bands as well, how crowded will they be?

Since 2m in the US is getting extremely overcrowded, and it is 4MHz wide, how is  
HF going to survive, with 3.75MHz band space TOTAL on all bands available. Bear  
in mind that this number is approximate - it was arrived at from my understanding  
of US bandplans. In the UK the 2m band is 2MHz wide, and there is 3.35MHz of HF  
available, since 40m is 7.000-7.100 and 80m is 3.500-3.800.

This won't be a popular view, but if ALL hams, code and no-code, suddenly had  
access

to ALL bands - what would happen?

Please don't mail me direct - if there is to be any debate I would prefer it to be on here ...

73, Scott

Besides the technical problems, there's the legal issues. Any non-ham traffic cannot move from Inet to Ham Packet. Also, even 3rd party traffic can cause grief.

As a result, the mail GW's are few and often much be carefully watched after.

>If my math doesn't fail me, that is .. 5 weeks, 6 days..

Well, it has been about six weeks or so since I sent in my 610 form for a change of address. Yesterday, I got the form back with a note telling me that I must use the \*new\* 610. They enclosed a copy of the new form stating I must fill it out and return it. So, I guess I'll do that and wait another 6-8 weeks again. What a wonderful government we have!

David

peake@dstos3.dstos.gov.au (Alan Peake) writes:

| Just a quick signal report on the broadcast (morning):

Ripper, mate - thanks!

| 40M - mostly 5 by 7 with a bit of qsb - best I've heard so far in Adelaide.

Good - it will get better once I get the dipole back where it belongs.

| 80M - unreadable

Not surprising - try it in the evening (1930 EST, no change for DST).

| 30M - unreadable - seems to be another station on the top all the time. Do you  
| hear that in Sydney?

No, other than the occasional CW signal.

| No other bands heard.

Well, you won't hear 160m, except possibly in the evening. There is  
sometimes a relay on 18.120 as well. There is also a 10m broadcast,  
on, ummm, 28.320 MHz.

| Also, is there a call-back? I have yet to hear it. And is  
| there a relay on 20M - haven't heard anything there either.

There are call-backs on all bands. However, what you hear in the morning  
on 160, 80 and 40 is AM, whereas callbacks (on 80 and 40) are taken on  
an SSB transceiver.

I spotted it! The quote should be "Because there's no bones in ice cream" and was spoken by Curly Howard of The Three Stooges in the episode entitled "You Nazty Spy" (Columbia, 1940).

Did I get it right?

Subject: You dont do this on the air why do it on the net?  
To: info-hams@ucsd.edu

Thank you. Thank you. Thank you. Thank you.  
I have been trying to raise the fact that address lines are embedded, complicated and not suitable for humans, to no avail. Since I am not a computer(yet anyway), I have no way of figuring out the e-mail address of someone on usenet. Even Brian Battles of the ARRL said that it would be impossible to correct.

Impossible????

All one has to do is add their address line after their name, not very difficult is it?

After all, I am on a PC running Windows, on a huge Lan Manager network, via an SMTP gateway, not on a UNIX box connected to internet. I am certainly not interested in deciphering:

ihnp4.ucsd.edu!agate!howland.reston.ans.net!EU.net!Germany.EU.net!news.dfn.de!  
news.coli.uni-sb.de!News.Saar.DE!hit.sb.sub.de!rmk@network.ucsd.edu

to reply to this person or whatever it is (I dont know what it is).

SO PLEASE, ADD YOUR ADDRESS LINE AFTER YOUR NAME AT THE END OF A MESSAGE.  
THANKS A MILLION
